

surevalve™

air matters™

THE REVOLUTIONARY NEW TIRE VALVE THAT WON'T LEAVE YOU FLAT.™

Patented break-away tire valve has valve core inside the wheel and double-seal design that secures the air in tires even if the valve stem is severed.

SureValve™ is a tire saver and a life saver...

because air matters.

Compare this innovative new valve to the old fashioned generic tire valve.

DOUBLE SEAL

Double seal prevents air, dirt and moisture from penetrating and corroding the valve core.

REPLACEABLE UPPER VALVE STEM

Unscrew and replace without removing tire from rim.

BREAK-AWAY POINT

When severe impact causes stem to break-away at score there is no loss of air.

SUBRIMAL™ VALVE BASE

Protects valve core and seals air in tire under all conditions.

surevalve™

NON-EXISTENT SEAL

Corrosive dirt, air, and moisture have access to the valve core.

ABOVE-RIM VALVE CORE

Valve core sits above the rim, vulnerable to breakage and damage. Results in immediate, catastrophic loss of air if severed.

ONE-PIECE VALVE ASSEMBLY

No break-away score in the valve stem. Tire must be removed and valve completely replaced.

GENERIC VALVE

US Patent No. 6,571,818

Exclusive Worldwide Manufacturing Licensee: Haltac Corp. Salem, OH 800.321.6471

"Dedicated to leadership in tire valve systems for today and tomorrow."
