

Haltec Tire Management System

Part Number: PSM0

About the Haltec Tire Management System

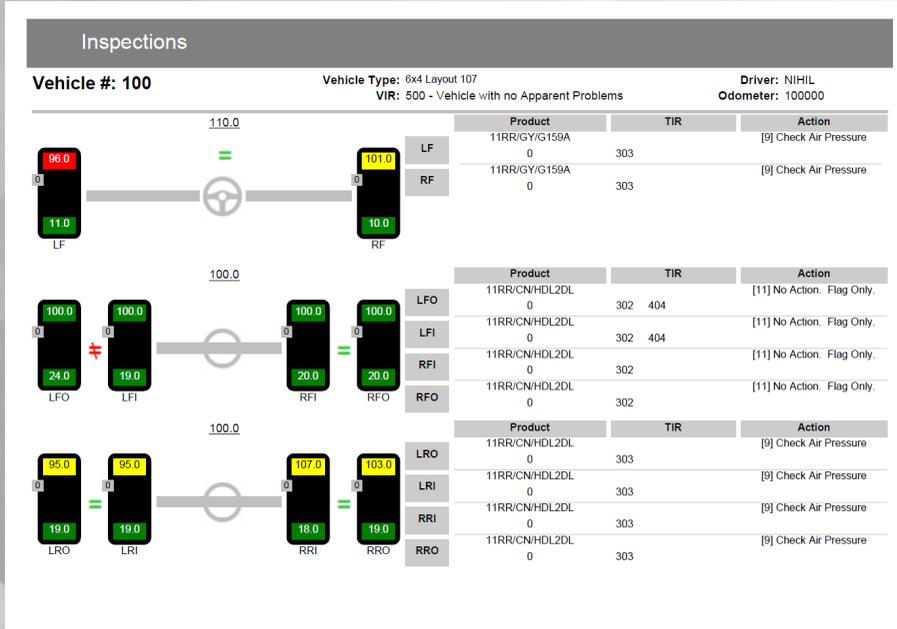

The Haltec Tire Management System is an easy to use, labor saving alternative to manual tire inspections. Increase process efficiency by up to 50% with this completely customizable program. The system is compatible with all Haltec Automatic Tire Inflators. You will receive instant access to monitor an entire fleet or branch or even individual vehicles. The program is easily managed by either your desktop or a synced smart device such as a phone or a tablet. Real time, user friendly reports can be instantly generated as well as daily, monthly, quarterly and annual reports. Add new locations or vehicles to your customized system with ease in just seconds.

The PneuSpector Gauge allows you to collect the tire tread depth and air pressure electronically. By eliminating the need for pencil, paper and multiple tools, you can increase your efficiency by over 50%.

- ✓ *Max pressure 150 PSI*
- ✓ *Precise air pressure measurements within 0.5 PSI*
- ✓ *Reliable tread depth readings up to 54/32nds*
- ✓ *Temperature Sensor*
- ✓ *Charging capabilities with replaceable Lithium batteries*
- ✓ *Chain 100 mA*
- ✓ *Communication through Bluetooth class 1 - 2.1+EDR*
- ✓ *Bluetooth potency 16 dBm*
- ✓ *LED lighting for inspections in low light*
- ✓ *Barcode Reader allows you to easily access all of your vehicles*

Haltec Tire Management System

The Vehicle Inspection Report shows a footprint of the vehicle and instantly color coordinates the tires based on fleet parameters.

See left: Red and yellow indicates low tread or air pressure and green indicates the tread is above pull point range as well as properly inflated.

The Haltec Tire Management Program

Inspection

- Pressure warnings
- Tread Depth warnings
- Sloped Wear warnings
- Dual Tread Mismatch
- Fleet Survey % Completed
- Fully customizable Fleet/Branch parameters
 - *Tread depth pull points*
 - *Recommended air pressure*
 - *Tire products make/model/size*

Analysis

- Inventory Valuation
- Tread Life Mileage
- Tread Life by Vehicle
- Tread Life by Wheel Position
- Tires by Tire Life
- Pressure Analysis Report
- Tread Depth Analysis
- Tread Depth by Axle
- Fleet Tires Summary
- Potential Loss Analysis
- Tire Performance Analysis

Process Improvement

- Process simplification: electronic communications
- Data integration with your current system
- Integration included in fee
- Provides basis for communication improvements
- Retreadability analysis
- Tire Inspector Productivity analysis

Haltec Products and Services

- U.S. technical support and repair center
- Complete fleet registration services
- Comprehensive software integration with all Automatic Tire Inflation Systems
- North American on-site training services
- Access to all tire valve hardware and equipment services
